# Maven-Setup

MARKDOWN Every time fun setting up a maven-project. Here is my minimal default-setup for: \* an additional src-folder \* setting up the compiler \* creating a fat jar via: mvn assembly:once ```xml org.apache.maven.plugins maven-compiler-plugin 1.7 1.7 maven-assembly-plugin org.tt.zmq.security.Grasslands jar-with-dependencies org.codehaus.mojo build-helper-maven-plugin 1.7 add-source generate-sources add-source src/main/gen-java ```
