Docker login - not working on linux?

MARKDOWN If you tried to login to docker hub using linux: `` docker login `` You might have trouble and getting a nasty problem: `` error getting credentials - err: exit status 1, out: `GDBus.Error:org.freedesktop.DBus.Error.ServiceUnknown: The name org.freedesktop.secrets was not provided by any .service files` `` To make a long story short. The solution: `` sudo apt install gnupg2 pass` `` [More read here](<https://stackoverflow.com/questions/50151833/cannot-login-to-docker-account>)
