

cmake: install files/directories

MARKDOWN If you want to put additional data to your executable when `make install` is called: `install(FILES ${CMAKE_BINARY_DIR}/bin/CoreData.pak DESTINATION bin) # also multiple files are allowed: install(FILES ${CMAKE_BINARY_DIR}/bin/CoreData.pak ${CMAKE_BINARY_DIR}/bin/Data.pak ${CMAKE_BINARY_DIR}/bin/EditorData.pak DESTINATION bin) # install(DIRECTORY src/ DESTINATION include/myproj FILES_MATCHING PATTERN "*.h")` More read: <https://cmake.org/cmake/help/v3.0/command/install.html> (<https://cmake.org/cmake/help/v3.0/command/>) <https://stackoverflow.com/questions/11096471/how-can-i-install-a-hierarchy-of-files-using-cmake> ([http](http://)
